ADDENDUM NUMBER 4
BID #16-243
NEWTOWN PARK DREDGING PROJECT

To All Prospective Vendors:

To follow is Addendum Number 4 on the Invitation to Bid for the Newtown Park Dredging Project. Please be sure to fax back the "Acknowledgement of Receipt of Addendum #4 as soon as possible.

Further questions submitted prior to deadline:

1. Do you have a Bid Bond Form you'd like us to use (to go along with Addendum #1)? On the website, the only bond forms available are the P&P bonds.

Answer: see attached forms.

2. On the Bidding Instructions page, there are two (2) areas reflecting four (4) different documents each for the Bid Package. Please confirm that all eight (8) documents are required in the Bid Package.

Answer: All points are required with the exception of #2 for compliance specifications sheets; that is irrelevant for this project.

3. On the Bidding Instructions page, Page 6, reference is made to a City Bid Schedule. Where can this document be found?

Answer: Bottom of page six (6)

4. On the Bidding Instructions page, Page 6, reference is made to the Applicable Compliance Specification Sheets. What is this?

Answer: See response above #2.

5. In this dredging project, must the process be hydraulic dredging, or can mechanical dredging be used to assist or be used on the project?

Answer: The bid must comply with the Invitation to Bid and Bid Form. If selected, the Contractor can propose alternative means for the Owner to consider.

6. If there is LESS THAN 700 cubic yards of materials available to dredge with the hydraulic dredge, will there be a compensatory rate for the awarded contractor?

Answer: The Contractor will be paid at the unit rate on the Bid Form for the amount of material removed, greater or less than 700 cy.

7. If there is a compensatory rate for the awarded contractor, how will this be determined, especially since there is no mobilization and demobilization line items?

Answer: Mobilization and Demobilization items were added to the Bid Form under Addendum #3. All Addendum's can be found on the City's website under Purchasing.

8. If there is more than 700 will the contractor have the option to remove it? If so will it be at the same unit cost or up to an agreement to be determined?

Answer: Please reference the answer to Question 6 above. The Owner desires the removal of as much sediment as possible.

9. Is the Pre-Dredge Survey available? If so, where do we find it?

Answer: Pre-Dredge Survey is part of the Construction Plans. Anticipated Post-Dredge Sediment Removal Contour Map, and Estimated Lake Sediment Volume Map are provided as part of Addendum #3. The maps are For Information Only and are not considered part of the Contract Documents.

10. Can the contractor remove any structures or vegetation within the project boundaries, and more specifically around the lake?

Answer: No.

11. Can other dewatering devices be implemented in addition or in lieu of geo-tubes?

Answer: Yes but alternatives must be approved. You must coordinate your submittal with the City if you request approval or disapproval prior to the bid opening.

12. Will the Owner consider an option and pricing structure for the contractor to remove sediment off site to a disposal area?

Answer: The bid must comply with the Invitation to Bid and Bid Form. If selected, the Contractor can propose alternative means of removal for the Owner to consider. Items important to the City include, but are not limited to, access within the park, disturbance or inconvenience to park visitors, noise, etc.
